

delight

SUMMER SABBATH AT PORT CITY

Evaluating where we spend our time helps us begin aligning our life in such a way that helps us *see God for who He truly is* and make space for the habits that lead us to experience true *delight!*

We encourage you to spend some time evaluating where your time is going by representing your average day on the chart on the back of this page. You can do this by identifying *four to six primary areas* of your life and assigning them a color, then color in the hours you spend doing them. This is made to be a honest assessment of how you are *currently living!*
